

## GEN II LIQUID LEVEL CONTROLLER

### Horizontal and Vertical Displacer Code Consolidation

This product notice is to inform you that we are consolidating all Gen II horizontal and vertical displacer product codes into one.

Starting April 18, 2019, we are consolidating all Gen II horizontal and vertical displacer codes into one, so that every Gen II will come with the components to configure in either vertical or horizontal displacer orientation.

This will significantly reduce the number of codes and make storage more efficient for Kimray and our customers.

Instead of creating new codes, we will be keeping the codes formerly assigned to vertical orientation and eliminating the horizontal codes.

Here are some examples of product codes that will be discontinued. Please note that this is not an exhaustive list:

<b>Vertical</b>	<b>Horizontal (Discontinued)</b>
CMM	CMMH
CMK	CMKH
CML	CMLH
CMME	CMMEH
