

7407 TRUNNION HUB SUBSTITUTION 3" LEVER OPERATED AND WEIGHT OPERATED DUMP VALVES

This product notice is to inform you that, effective 8/13/21, we will be installing the 7407S6 trunnion hub instead of 7407 in all 3" lever operated and weight operated dump valves.

This is a material upgrade (cast steel to 316 stainless steel) and will have no negative impact on performance. Prices and shipping dates will not be affected.

This replacement is due to pandemic-related supply chain challenges. We currently plan to return to 7407 on 9/2/21.
